

AMENDMENTS TO THE CLAIMS

The listing of claims presented below replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1 – 20 (Canceled).

Claim 21 (New): A resin composition comprising a biodegradable resin and an organically modified layered silicate, the organically modified layered silicate comprising a layered silicate and a substituted silyl group, the substituted silyl group bonding to the layered silicate and comprising a substituted or non-substituted alkyl group, and the layered silicate comprising a silanol group on a surface thereof,

wherein the substituted silyl group further comprises a substituent selected from the group consisting of an amino group, an epoxyethyl group, an epoxyethyloxy group, a vinyl group, an isopropenyl group, a 1-phenylvinyl group, a 4-vinylphenyl group, an isocyanate group, and a hydroxyl group and the substituent bonds to a silicon atom of the substituted silyl group.

Claim 22 (New): The resin composition as claimed in claim 21, wherein the number of carbon atoms in the alkyl group is 3 or greater and 18 or less.

Claim 23 (New): The resin composition as claimed in claim 21, wherein the biodegradable resin is a polyester-based resin.

Claim 24 (New): The resin composition as claimed in claim 23, wherein the polyester-based resin is poly(lactic acid).

Claim 25 (New): A resin molded object, wherein the resin molded object is obtained by molding the resin composition as claimed in claim 21.

Claim 26 (New): A resin composition comprising a biodegradable resin and an organically modified layered silicate, the organically modified layered silicate comprising a layered silicate and a substituted silyl group, the substituted silyl group bonding to the layered silicate and comprising a substituted or non-substituted alkyl group, and the layered silicate comprising a silanol group on a surface thereof,

wherein the substituted or non-substituted alkyl group is a substituted first alkyl group, the substituted first alkyl group comprises a substituent selected from the group consisting of an amide linkage, an ester linkage, an N-oxymethyleneamino group, and an N,N-di(oxymethylene)amino group, the substituent bonds to a terminal of the first alkyl group, and the substituent comprises a non-substituted second alkyl group.

Claim 27 (New): The resin composition as claimed in claim 26, wherein the total of the number of carbon atoms in the first alkyl group and the number of carbon atoms in the second alkyl group is 3 or greater and 18 or less.

Claim 28 (New): The resin composition as claimed in claim 26, wherein the biodegradable resin is a polyester-based resin.

Claim 29 (New): The resin composition as claimed in claim 28, wherein the polyester-based resin is poly(lactic acid).

Claim 30 (New): A resin molded object, wherein the resin molded object is obtained by molding the resin composition as claimed in claim 26.
